

GDPR Controls and Netwrix Auditor Mapping

About GDPR

The General Data Protection Regulation (GDPR) is a legal act of the European Parliament and the Council (Regulation (EU) 2016/679) that was adopted in April 2016 and comes into force on May 25, 2018. The GDPR primarily seeks to provide unified and clear rules on stronger data protection that are fit for the digital age, give individuals more control of their personal information processed by companies and ease law enforcement. The GDPR will repeal the current legal act (Directive 95/46/EC) enacted in 1995, which has been inconsistently interpreted by the various European Union member states.

In addition to harmonizing data protection law across the EU, the new regulation will also affect non-European companies that offer goods or services to, or monitor the behavior of, European Union residents, and therefore process any of their personal data. This refers to the extraterritorial application of the law. In other words, organizations of all types from across all industries that are established outside the European Union but that conduct business within it will be subject to GDPR compliance starting May 25, 2018.

The extended jurisdiction of the GDPR is arguably the biggest change to the 1995 Directive. The other important principles laid down in the GDPR are the following:

- **Extended rights of data subjects** — These, among others, include the right of access, the right to data portability and the right to data erasure.
- **72-hour data breach notification** — In the case of a personal data breach, an organization must notify the supervisory authority not later than 72 hours after having become aware of it.
- **Privacy by design** — Organizations must ensure that, both in the planning phase of processing activities and in the implementation phase of any new product or service, GDPR data protection principles and appropriate safeguards are addressed and implemented.
- **Accountability** — An organization must ensure and demonstrate compliance with the data protection principles of the GDPR.

Fines for non-compliance with the GDPR depend on the infraction. In the case of a personal data breach (defined as a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to, personal data transmitted, stored or otherwise processed), the fine is up to 4% of the company's annual worldwide turnover or €20 million, whichever is higher. For other infringements of GDPR provisions, the fine is up to 2% of annual worldwide turnover or €10 million, whichever is higher.

Mapping of processes and report categories to the provisions of the GDPR articles

The following table lists some of the key provisions of the GDPR and explains how Netwrix Auditor can help your organization achieve compliance with those provisions. Please note that the efforts and procedures required to comply with GDPR requirements may vary depending on an organization's systems configuration, internal procedures, nature of business and other factors. Implementation of the procedures described below will not guarantee GDPR compliance, and not all the controls that Netwrix Auditor can possibly support are included. This mapping should be used as a reference guide to help you implement policies and procedures tailored to your organization's unique situation and needs.

| <p>so by Union or Member State law.</p> | <p>permissions to files and folders against HR employee listings and employee job descriptions using the Account Permissions report.</p> <p>Review the Excessive Access Permissions report to verify that no excessive access rights are assigned to employees beyond those needed for their primary job responsibilities.</p> <p>Use the video recording capability of Netwrix Auditor to capture the screen activity of privileged users in critical IT systems and applications (in particular, those that do not log events); use the video recording notification feature to notify users that their activity can be monitored and recorded, which fosters appropriate use of systems and data.</p> | |
| <p>Article 33. §1. In the case of a personal data breach, the controller shall without undue delay and, where feasible, not later than 72 hours after having become aware of it, notify the personal data breach to the supervisory authority...</p> | <p>Use preconfigured alerts to respond quickly to threat patterns that violate corporate security policies and indicate possible cyber security incidents, including a personal data breach. The notifications, which you can easily customize, are sent to the specified emails as the events occur, enabling you to rapidly react to a possible data breach and notify authorities promptly.</p> <p>Use report subscriptions to automate delivery of critical audit reports to a set of email addresses or a designated network folder daily or on any other schedule. Each report can be delivered to multiple recipients at the same time without the need to configure each subscription separately.</p> | <p>[Process] Establish an effective early warning system with the alerting feature of Netwrix Auditor.</p> <p>[Process] Enable continuous monitoring of critical IT systems and ongoing review of critical reports with the report subscription feature of Netwrix Auditor.</p> |

Control Processes and Report Categories

Control Processes Facilitated by Netwrix Auditor

From a compliance perspective, IT operations can be viewed and managed as a collection of control processes. Such processes enable focusing organizational efforts on a specific area of IT, enforcing certain policies and establishing particular set of compliance controls. While control processes can be seen as separate entities for the purposes of implementation and management simplicity, in fact all these processes are deeply interconnected and are often intrinsic to many regulations and best practices frameworks.

Netwrix Auditor Report Categories

For better efficiency and a more focused approach to the audit data processing, Netwrix Auditor reports are classified into the following categories:

| | |
|--------------------------|-------------------------|
| Account Changes | Group Membership States |
| Account States | Password Changes |
| All Changes | Password Policy Changes |
| All States | Permission Changes |
| Configuration Changes | Permission States |
| Configuration States | Policy Changes |
| Data Access | Policy States |
| Data Changes | Security Changes |
| Data Integrity | System Integrity |
| Data States | System Access |
| Group Membership Changes | User Activity |

The tables below detail the predefined reports in each category.

Access Control

Process for establishing selective restrictions of access to information systems and data.

| Report Category | Netwrix Auditor Report | Audited System | Priority |
|-----------------------|-------------------------------------------------------------|-------------------|-----------|
| Account Changes | Recently Enabled Accounts | Active Directory | Primary |
| Account Changes | User Account Status Changes | Active Directory | Secondary |
| Account States | Accounts with Most Logon Activity | Active Directory | Primary |
| Account States | Temporary User Accounts | Active Directory | Primary |
| Account States | User Accounts - Passwords Never Expire | Active Directory | Primary |
| Account States | User Accounts | Active Directory | Secondary |
| Account States | User Accounts - Expired | Active Directory | Secondary |
| Account States | User Accounts - Locked | Active Directory | Secondary |
| All Changes | All Active Directory Changes by Group | Active Directory | Secondary |
| All Changes | All Events by Source | Event Log | Primary |
| All Changes | Local Users and Groups Changes | Windows Server | Primary |
| Configuration Changes | Organizational Unit Changes | Active Directory | Secondary |
| Configuration Changes | User Account Locks and Unlocks | Event Log | Primary |
| Configuration Changes | Address List Changes | Exchange | Secondary |
| Configuration Changes | Interactive Logon Setting Changes | Group Policy | Primary |
| Configuration States | Organizational Units | Active Directory | Secondary |
| Data Access | All Exchange Server Non-Owner Mailbox Access Events | Exchange | Primary |
| Data Access | All Exchange Server Non-Owner Mailbox Access Events by User | Exchange | Primary |
| Data Access | All Exchange Online Non-Owner Mailbox Access Events | Exchange Online | Primary |
| Data Access | All Exchange Online Non-Owner Mailbox Access Events by User | Exchange Online | Primary |
| Data Access | Access to Archive Data | File Servers | Primary |
| Data Access | Data Access Surges | File Servers | Primary |
| Data Access | Excessive Access Permissions | File Servers | Primary |
| Data Access | Successful File Reads | File Servers | Secondary |
| Data Access | Data Access | Oracle Database | Primary |
| Data Access | SharePoint Read Access | SharePoint | Primary |
| Data Access | Data Access | SharePoint Online | Primary |
| Data Changes | SharePoint Content Changes by User | SharePoint | Secondary |
| Data Changes | All SQL Server Data Changes | SQL Server | Secondary |
| Data Integrity | Exchange Online Public Folder Changes | Exchange Online | Primary |
| Data Integrity | Failed Change Attempts | File Servers | Primary |
| Data Integrity | Failed Read Attempts | File Servers | Primary |
| Data Integrity | Share Changes | File Servers | Secondary |
| Data Integrity | Files and Folders Moved | File Servers | Secondary |

| | | | |
|--------------------------|-------------------------------------------------------------------|------------------|-----------|
| Data Integrity | Files and Folders Renamed | File Servers | Secondary |
| Data Integrity | Files Copied | File Servers | Secondary |
| Group Membership Changes | Distribution Group Changes | Active Directory | Primary |
| Group Membership Changes | Security Group Membership Changes | Active Directory | Primary |
| Group Membership Changes | Administrative Group Membership Changes | Active Directory | Secondary |
| Group Membership Changes | Exchange Online Group Changes | Exchange Online | Primary |
| Group Membership Changes | Group Membership by User | File Servers | Primary |
| Group Membership States | Effective Group Membership | Active Directory | Primary |
| Group Membership States | Group Members | Active Directory | Primary |
| Group Membership States | Administrative Group Members | Active Directory | Secondary |
| Group Membership States | User Accounts - Group Membership | Active Directory | Secondary |
| Password Changes | Password Resets by Administrator | Active Directory | Secondary |
| Password Changes | User Password Changes | Active Directory | Secondary |
| Password Policy Changes | Password Policy Changes | Group Policy | Secondary |
| Permission Changes | Exchange Online Mail User Changes | Exchange Online | Primary |
| Permission Changes | Exchange Online Mailbox Permissions Changes | Exchange Online | Primary |
| Permission Changes | Permissions Changes | File Servers | Primary |
| Permission Changes | SharePoint Permissions Changes by User | SharePoint | Primary |
| Permission States | Account Permissions | File Servers | Primary |
| Permission States | Object Permissions by Object | File Servers | Primary |
| Policy Changes | Exchange Online Mailbox Policy Changes | Exchange Online | Primary |
| Policy Changes | User Rights Assignment Policy Changes | Group Policy | Primary |
| Policy Changes | Account Policy Changes | Group Policy | Secondary |
| Policy Changes | User Configuration Changes | Group Policy | Secondary |
| Policy States | Account Policies | Group Policy | Secondary |
| Security Changes | All Security Events by User | Event Log | Secondary |
| Security Changes | Renaming of Administrator and Guest Accounts Through Group Policy | Group Policy | Secondary |
| System Access | Activity Outside Business Hours | Active Directory | Primary |
| System Access | All Logon Activity | Active Directory | Primary |
| System Access | Failed Logons | Active Directory | Primary |
| System Access | Interactive Logons | Active Directory | Primary |
| System Access | Logons by Multiple Users from Single Endpoint | Active Directory | Primary |
| System Access | Logons by Single User from Multiple Endpoints | Active Directory | Primary |
| System Access | Successful Logons | Active Directory | Primary |
| System Access | User Accounts - Last Logon Time | Active Directory | Primary |
| System Access | User Logons and Logoffs on Domain Controllers | Active Directory | Primary |
| System Access | Azure AD Logon Activity | Azure AD | Primary |
| System Access | Failed Logon Attempts | Event Log | Primary |
| System Access | Logoffs by User | Event Log | Primary |
| System Access | Remote Desktop Sessions | Event Log | Primary |

| | | | |
|---------------|-------------------------------------|-----------------|-----------|
| System Access | Successful Logons by User | Event Log | Primary |
| System Access | Wireless Network Policy Changes | Group Policy | Primary |
| System Access | All Oracle Database Logons | Oracle Database | Primary |
| System Access | All SQL Server Logons | SQL Server | Primary |
| User Activity | All Exchange Server Changes by User | Exchange | Secondary |
| User Activity | File Server Changes by User | File Servers | Primary |
| User Activity | All File Server Activity by User | File Servers | Secondary |
| User Activity | All SQL Server Activity by User | SQL Server | Primary |
| User Activity | All User Activity by User | User Activity | Primary |
| User Activity | All Windows Server Changes by User | Windows Server | Secondary |

Account Management

Process for issuing, removing, maintaining and configuring information systems' accounts and related privileges.

| Report Category | Netwrix Auditor Report | Audited System | Priority |
|-----------------------|-------------------------------------------------------------|------------------|-----------|
| Account Changes | Computer Account Changes | Active Directory | Primary |
| Account Changes | Contact Object Changes | Active Directory | Primary |
| Account Changes | Recently Enabled Accounts | Active Directory | Primary |
| Account Changes | User Account Changes | Active Directory | Primary |
| Account Changes | User Account Status Changes | Active Directory | Primary |
| Account Changes | User Account Management in Azure AD | Azure AD | Primary |
| Account Changes | User Accounts Created and Deleted Directly in Azure AD | Azure AD | Primary |
| Account Changes | User-Initiated Password Changes in Azure AD | Azure AD | Primary |
